Space and Texture

**Space** is the area between and around objects.

The object fills positive space while negative space surrounds the object.

Space is created in a two-dimensional artwork by using perspective, overlapping, and color and value, creating the appearance of depth or distance.

**Texture** is the surface appearance or feel is texture, which may be smooth, rough, prickly, fuzzy, hard, etc.

Texture is created in both two and three-dimensional art using a variety of techniques and materials.

**Exploration Challenge:** Create your own drawing of positive and negative space in a picture using a pencil.

**Exploration Challenge:** Trace your hand and be creative in drawing different textures on each finger and the palm.
